

SERVICE BULLETIN

Subject: MDT3 and MDT4 Compressor Contactor

Beginning with MDT4F12A-1H serial number 11011320013662, a contactor has been added to operate the compressor. That unit was manufactured 1-27-11. MDT3F12A-1Hs manufactured after that serial number also have the contactor change. The contactor is located in a new, larger control box with the controller.

The part numbers for the contactor and related harness are:

- 12-2469-03 Contactor, 115/60/1
- 12-2469-02 Contactor, for 50 Hz model
- 12-3042-01 Wire harness for 60 Hz model w/contactor
- 12-3042-02 Wire harness for 50 Hz model w/contactor

There is a control box kit to add the contactor to a prior model, the kit numbers are:

- A37895-021 60 Hz
- A37895-026 50 Hz

The above kits do NOT include a new controller, when installing a kit the existing controller will be moved from the original box to the new one.

A wiring diagram is on the back of this bulletin.
