SERVICE BULLETIN

Subject: ERC301 Fan Motor

Effective with serial number 103236-10B, the ERC301 remote condenser is being manufactured with a one-third H.P. fan motor instead of the prior one-quarter H.P. motor.

The part number for the new motor is: **18-8797-32.**

Although the ERC301 is the only condenser manufactured with the one-third HP fan motor, the 18-8797-32 motor will be used as a common replacement for ERC151, ERC201, ERC302, ERC401, and ERC402 fan motors.

Note: Fan motors shipped and ERC301 condensers built after 11/1/98 have a shorter shaft. The fan blade mounts flush to the end on those motors. A quick check is that the "flats" on the motor shaft are now $1\frac{5}{8}$ " long and they were $2\frac{1}{2}$ " long. When the longer shaft one-third HP motor is used, position the fan blade $\frac{7}{8}$ " in from the end of the motor shaft.
