For Use In:

- ▶ Bars
- ▶ Restaurants
- ▶ Cafes
- ▶ Coffee Shops
- ▶ Break Rooms

Introducing Essential Ice™
from Scotsman.

THE BASICS, COVERED.

Scotsman®
ICE THE WORLD DEMANDS

THE BASICS, COVERED.

You want ice, not issues. That's why Scotsman created the Essential line of ice machines. Small in stature. Big on reliability and ease of use. Because at the end of the day, what you really want is a machine that works as hard as you do.

RELIABILITY

U.S. manufactured and run-tested at our award-winning facility in Fairfax, South Carolina, the Essential comes with an outstanding 3-year parts and labor warranty on all components.

EASE OF USE

When it comes to keeping everyone happy, ease of use is key. You'll get no complaints on the Essential.

► SLIDE-UP DOOR

Because saving space is important, the Essential features a durable slide-up door, so there's no need to plan placement around right- or left-opening doors.

► LARGE ACCESS AREA

To make the most of every trip, a large access area promotes ease of use. Plus, a large, dishwasher safe scoop comes standard.

► INTUITIVE CONTROL PANEL

We've kept things simple. Our intuitive control panel features a prominent On/Off/Clean switch and easy-to-see buttons for adjusting ice thickness and harvest time.

QUALITY ICE

What do ice lovers want to see in an ice cube? Nothing. That's why the Essential delivers cubes in one color and one color only: Clear. Made with our innovative horizontal evaporator, the Essential doesn't let minerals freeze in cubes, because spray jets help to keep them washed away. So from your first scoop to your last, you're ensured perfect cubes.

ENVIRONMENTALLY FRIENDLY

When you've been making ice machines as long as Scotsman, better is in your DNA. That's why all of our machines are designed responsibly to lead to lower energy costs. All applicable models already meet upcoming 2018 DOE Energy Efficiency Regulations. Plus, the Essential uses R-134a refrigerant, which does not deplete the ozone layer. And recyclable aluminum alloy side panels offer the same durability and corrosion resistance as stainless while improving long-term sustainability.
