

Instructions

for the installation of bin top adapter, KBT34

The KBT34 adapter is designed to allow the placement of a CME686 or CME810 or an EH222 onto a Scotsman B948 ice storage bin. The adapter is made up of **three parts**, a 30" wide **plastic section** and two **stainless steel filler plates**. Hand tools will be required to install this adapter.

The KBT34 contains:

- One 30" x 24" plastic ice machine support
- Two stainless steel filler plates with attached insulation.
- Two mounting brackets
- Six 5/16 - 18 cap screws
- Two 8-32 machine screws
- Four #10 flat washers
- Six 5/16 flat washers
- One tube of RTV sealant

1. Place the large plastic ice machine support in the center of the bin's top area.
2. Place one stainless steel filler plate on each side of the plastic ice machine support. The open end goes over the canopy.
3. Secure the stainless steel filler plates to the bin with one bolt in each.
4. Locate the ice machine attachment brackets. Use them to secure the plastic ice machine support to the bin using the bolts and washers from the kit.
5. Seal the junction point of the stainless steel filler plates and the plastic ice machine support with a bead of food grade sealant from the tube in the kit.
6. Complete the ice machine installation. Use brackets from step 4 to attach ice machine to bin.
