# Smart-Board Live Demo

## Smart-Board Access through Ethernet or Internet**

Dynamic DNS or static IP required

## Click or Scan here to try it live!

A Prodigy logo screen will appear. After a few seconds it will update and show a screen similar to the one here. Login as an observer or administrator using the below password.

**Observer Password is: 123456**

**Administrator Password is: 654321**

### As an Observer, several actions are available at this screen:

- Controller Snapshot
- AFB Config File
- Key Pad Lock Status
- Time To Clean Setting
- Flush Level Setting
- Bin Level Scheduling
- Change Password

Controller Snapshot lists the current status of many aspects of the controller.

AFB Configuration File lists the current status of many aspects of the Smart-Board and the controller.

Key Pad Lock Status lists if the key pad of the controller is locked or not.

Time to clean setting. Lists the number of months of power up time the unit must accumulate before the De-Scale / Sanitize light is switched on.

Flush Level Setting lists the Purge level the controller is set to use.

Bin Level Scheduling. Only applies to units that have the Vari-Smart ice level control installed. Lists the times and levels that have been set.

### Logging in as an Administrator allows additional actions:

Key Pad Lock or Unlock. Lists if the controller is locked or not and can be changed by selection and submitting.
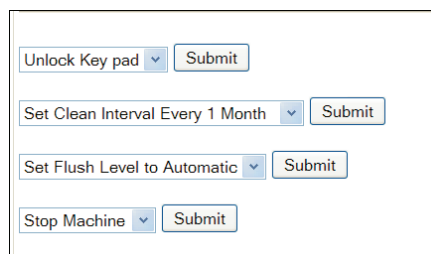

Adjust the Clean Notice. Lists the number of months of power up time the unit must accumulate before the De-Scale / Sanitize light is switched on. Selecting a different interval and submitting will change that number.

Adjust the Purge or Flush level. Lists and allows change of the amount of water purged per cycle.

Start or stop the machine. Allows the machine to be started or stopped remotely.

**This kit (KSBU-N) can be added to any modular Prodigy unit**
