

## SERVICE BULLETIN

### Subject: Redesigned Ice thickness Sensor and Water Level Sensor

The ice thickness sensor (ITS) and water level sensor (WLS) have been redesigned for the new Prodigy ELITE® modular cube ice machines.

The improved sensors are more robust in construction and have been designed to minimize scale buildup and make cleaning simple and easy.

The new sensors have been tested and have performed without issue.

**Authorization from Scotsman technical service will be required before replacing an ITS or WLS on a Prodigy ELITE machine.**
