

Essential Ice Cubers

Floor Mounting Kits KUFM15 and KUFM20

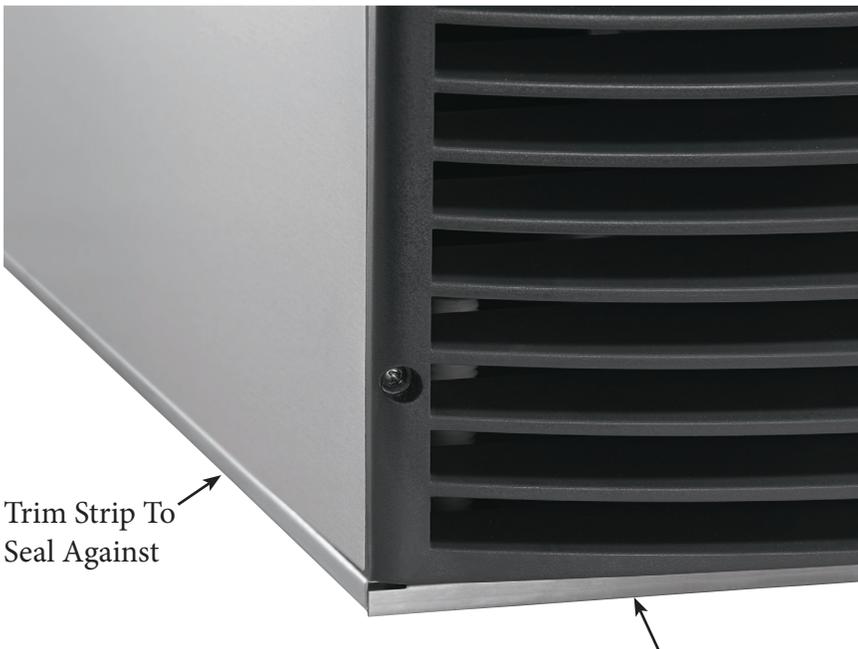

Floor mounting the CU0415, CU0715 or CU0920 makes the overall height of the cabinet 32 inches, including the kit's parts. That height allows the cabinet to be placed under a 34 inch ADA countertop, including allowing up to an inch and three quarters for the counter itself. The trim strips provide a sealing surface and the bolts provide glides to reduce floor damage and allow leveling.

Kit Contents: 4 trim strips, 4 plastic bolts, 8 washers, tube of sealant.
