

BIN INSTALLATION & SANITIZING PROCEDURE

KDB230 – KDB650 – KDB950

DOC. #307-1082-01

Welcome

To ensure that the front slope bin delivers the best degree of service, we ask that you take a moment to review this manual before beginning the installation of the bin. Should you have any questions or require technical help at any point please call our technical service group at 1-800-840-9577

Before you Begin

After uncrating and removing all packing material, inspect the equipment for damage. If damage is found contact the shipper immediately.

Installation

- 1) Remove all packing material from Bin
- 2) Remove all tape and temporary fastenings from the door and outside of bin
- 3) Remove set of four (4) legs and any other accessories packed inside bin
- 4) Remove bin from skid by laying bin on it back and unbolting the bin from the pallet
- 5) Screw the legs into the holes in the bin bottom and tighten till legs are seated against the bottom of the bin
- 6) Set bin upright and move to its new permanent location.
- 7) Level the bin in both directions by adjusting the foot at the bottom of each leg
- 8) Install provided gasket on all four (4) top edges, this should be placed in the area the ice machine will sit, approximately ½" from the outside edge making sure that the ice machine fully covers the gasket
- 9) Mount icemaker(s) on bin in accordance with icemaker manufactures instructions
- 10) Connect drain line to ¾" IPS female fitting located in the bottom of the bin. Drainage should not be directly connected to waste water source drains without acceptable backflow protection.

Caution: Do not use excessive force when connecting to the bin drain fitting. Do not apply excessive heat to any fittings connected to the bin drain as this may melt the plastic in the drain fitting

Cleaning and Sanitizing

Interior of Bin

The bins are equipped with polyethylene liner that should be cleaned and sanitized prior to use and periodically with any cleaner and sanitizing products suitable for use in a food zone.

Important: We recommend installing a properly sized water filter on the water supply to the ice maker to remove chlorine

Exterior Bin Cleaning Exterior surfaces can be cleaned with a Stainless Steel cleaner or polish
