

SUBJECT: IDC255 Dispenser

The IDC255 is a new dispenser model from Cornelius. Placing a Scotsman ice machine on it requires an adapter from Cornelius.

As shipped, both the Scotsman CM³ and the Prodigy work well and fill the dispenser very full. If the situation requires less ice, in most cases the ice level can be lowered by adding a kit or deploying the available thermostat. See the table for the appropriate method of lowering ice. Nugget models must use the listed ice level kit.

See Cornelius to confirm the adapter numbers.

CM³:

	CME256-CME806	CME1056, CME1386, CME1686, CME2086	CME306-CME456	CME686-CME810
Cornelius Adapter	629088536	629088536	629088537	629088662
Scotsman ice level kit	to be determined	Use supplied thermostat	KSTAT-22	none, ice sensor location provides lower ice level

Prodigy:

	C0330-C1030	C0322-C0522	EH222	EH430
Cornelius Adapter	629088536	629088537	629088662	629088536
Scotsman ice level kit*	KVS	KVS	KVS is standard on EH222	KVS

* Use the Vari-Smart system, set to the first position CW.

Nugget:

	NME1254	NME454, 654, 954
Cornelius Adapter	629088672	629088677
Scotsman ice level kit	KDIL-N-CFF	KDIL-N-CFF
