

Subject: BH1100, BH1300 and BH1600 Standard Top Bins

The standard top of these bins is made up of these components: A stainless steel support frame, a poly top and 4 filler panels.

The filler panels include two 13.5" and two 9" panels.

Panels are used to take up space next to and between the ice machines as needed to adjust to the different width models. They rest on a ledge molded into the poly top.
