

### Subject: Bin top height adders

Listed below are some bin tops and heights they add to the bin or dispenser.

Note: ID150 and ID200 and ID250 spec sheet heights include maximum height of the sloped cover, which is removed when the bin top is used. The cover added about 1 5/8", so using the bin top can lower the height in some cases (see table below). Due to gaskets, total machine height may be +- .25". Also, some space must be allowed above the machine for the installation.

Kit	Adds height	Net Height on ID150	Net Height on ID200	Net height on ID250
