

**Subject: Freestyle®**

The Freestyle (22") dispenser can accept a variety of top mounted Scotsman ice machines.

**Cubers:** C0322, C0522, C0722 and EH222

Any 22 inch cuber (like C0522, C0722) may be mounted onto the Coke Freestyle. Coke supplies the adapter. No Scotsman adapter is used or available. KVS is recommended. Cubed ice may be used for manual filling without any modification or kit.

**EH222 Prodigy Plus Units:** Removal of the lower front panel trim strip is required. The **KFSPP** is available to fill the front panel holes.

The counter top **Freestyle 7000 (30")** will accept all 22" & 30" cubers. The KVS is required and the adapters are available from Coke.

Use the below chart to determine the required kit for use with the 22" wide non-countertop Freestyle

	Adapter - Silver	Adapter - Red	Adapter - Black	Ice level control	Prodigy Plus units	Nuggets	
						Top Mounted	Manual Filling
C0322 C0522 C0722	46010	46011	46012	KVS		NA	NA
EH222	46007	46008	46009	Included with head	KFSPP	NA	NA
N0622 N0922 N1322	46007	46008	46009	Included with KFSTM		KFSTM	KFSMF

The colors are for the trim components that fit next to the ice machine and are intended to match the color scheme of that particular Freestyle. The adapter numbers are for reference only as they are only available from Coke. Adapter numbers are KO CCP # (IC Code #).

Adapters are a stainless steel frame that is mounted to the dispenser walls. It supports the ice machine and includes a manual fill door. The front cross brace position is adjustable to accommodate different depths of ice machine cabinets. The manual fill door has a rubber gasket at its back to touch and seal against the ice machine front panel.

**Nuggets**

- N0622, N0922 and N1322

These models may be mounted onto the Coke Freestyle or used for manual filling. As with a cuber Coke supplies the adapter, and it is the same as is used for C0522 or C0722. The Coke adapter is required for any top mounted ice machine.

Plus, in addition to the Coke adapter, these kits are needed to revise the Freestyle to dispense nugget ice:

**Top Mounted:** Nugget ice use KFSTM. KVS is not used because the kit includes a bin thermostat.

**Manual Filling:** Nugget ice use KFSMF.
