## **BIN TOP INSTALLATION INSTRUCTIONS 22" wide modular nugget or flaked ice machine**

This kit consists of 2 filler plates, 2 bolts, 2 washers and a tube of food grade silastic sealant. The two filler plates cover up the space on top of the bin when an ice machine is centered on it.

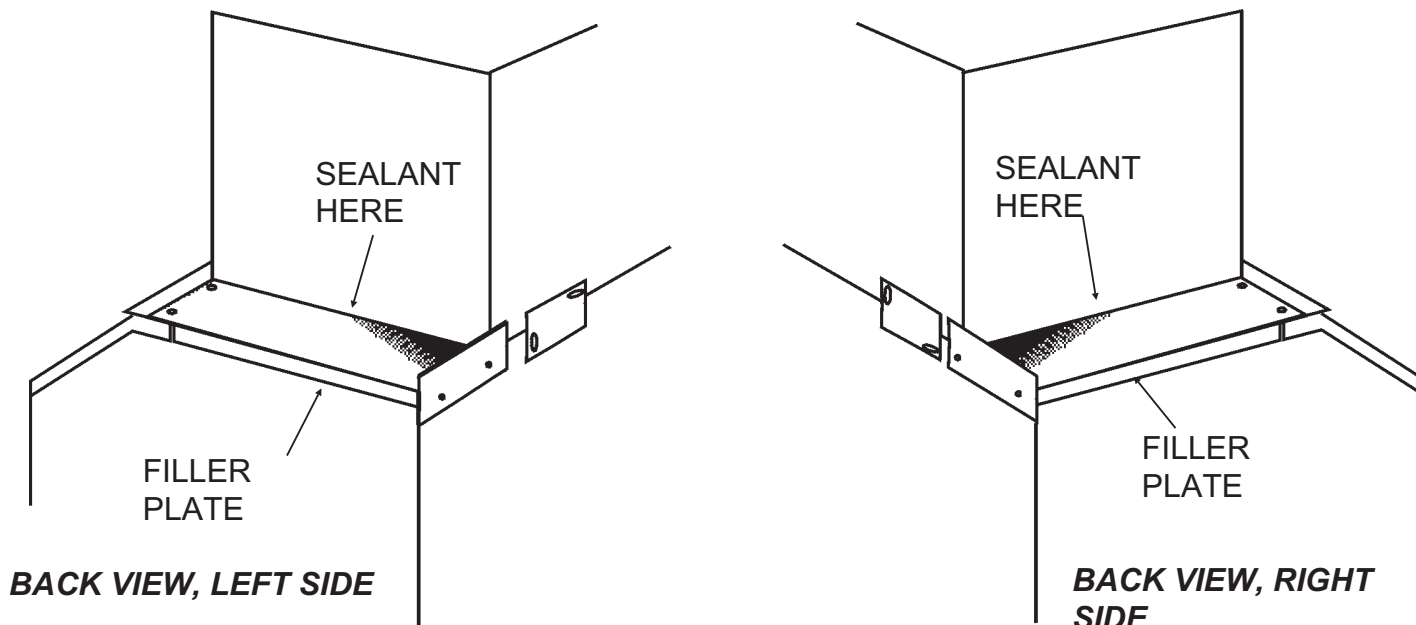

To Install:

1. Mount the ice machine on the bin top, centered over the bin.
2. Slide each filler plate onto the top of the bin, one on the right and one on the left.

---

**Note: There is a right and a left filler plate; the insulation on the bottom determines position, place the filler plates on the bin so that the insulation is closest to the ice machine.**

---

3. Secure the bin tops to the bin at the back, use 1 bolt from the kit for each plate.
4. Place a bead of silastic sealant (from the kit) onto the top edge of each filler plate next to the ice machine. Wipe off excess silastic.
5. Attach the machine to the bin using the machine brackets and bolts from the hardware shipped with the ice machine.
6. Proceed with the balance of the installation per the instructions in the manual shipped with the ice machine.
