

Instructions

For the installation of bin top kit, KBT27.

Applications: 22" wide ice machines on 30" wide bins.

Kit Contents: 2 bin top filler panels, food grade sealant.

1. Place panels from kit on top of bin.
 2. Cut front and rear gasket at inside edge of each bin top panel.
 3. Remove filler panels.
 4. Remove the bin's gasket material from the area to be covered by the filler panels. This includes left edge, right edge, left and right sections of the front and left and right sections of the back.
 5. Apply food grade sealant (from the kit) to the top edges of the bin and canopy (where the gasket was).
 6. Place panels onto sealant.
 7. Apply a bead of food grade sealant to the place on the top edge of each filler panel where the ice machine will be.
 8. Place ice machine onto bin. Center left to right on the bin.
 9. Fasten mounting straps to ice machine (use bolts from ice machine's hardware bag).
 10. Fasten mounting straps to bin - For Scotsman bins use the mounting straps at an angle & the bolts from the hardware bag.
- Other bins: Drill two shallow holes and use field supplied sheet metal screws & washers to secure the brackets to the bin.
