

SERVICE BULLETIN

Subject: Model Series Revision, C0330 and CB0330 "C" Series

The compressor used on C0330 and CB0330 modular cubers has been changed. Because the new compressor is not interchangeable with the prior type, the model series has been changed to **C**. The new compressor is the same one used in C0530 C. Freeze cycle times are slightly shorter than prior models.

C Series Service Compressors:

- 115/60/1 - 18-8948-21 - includes starting components
- 208-230/60/1 - 18-8948-23 - includes starting components
- 230/50/1 - 18-8948-22 - includes starting components
