**Subject: Prodigy Model Series Revision, “E” Series**

All Prodigy Cubers, Flakers and Nugget machines will be released as Revision E. The new “E” revision represent an increase in energy efficiency, All of the new Rev. E models meet or exceed the new DOE requirements. In addition to the energy improvement all remote cooled Rev. E models will now require brazed line set connections instead of quick connects. This will help ensure that the customer gets a custom install by a qualified licensed refrigeration technician. This will also help to eliminate installation issues that can directly impact machine longevity and reliability. Up-to-date parts breakdowns can be found at the following link.
