## **Subject: Thermostat Change**

The bin and cube size thermostats used in several models are switching from being supplied by GE to Danfoss, resulting in new part numbers for the service parts.

The first to change is 11-0578-21, used in SCC30, SCC50, CU50, CU0415, CU0715 and CU0920.

The new part number for the bin thermostat in those models is **11-0617-21**. It is interchangeable with the prior thermostat.
