Subject: MDT5 Ice Dispensing Chute Change

Scotsman has changed the design of the ice chute on the MDT5 ice maker-dispensers. The prior chute slid onto the outside of the storage bin spout.

The chute is now attached to a new bracket with screws, as shown in the photo.

The bracket and chute are available in a kit for use on prior models. The kit number is **A39845-021**.

The chute alone is part number 02-3944-01.

Production of MDT5s with the new design began the week of November 15. The first unit was MDT5N25A-1J serial number 10111320012893.
