

NB1322 – 1300 lb Nugget Ice Machine

Prodigy® Advanced Sustainability Modular Nugget Ice Maker

PRELIMINARY

Shown on B948S bin with optional KLP85 legs.

Features

The path to a more sustainable operation is through Prodigy Advanced Sustainability™. Integrated controls for optimizing energy and water efficiency and enhanced service diagnostic capability, help operations save money and natural resources.

Ultimate ice level management with a programmable seven-day 15 set-point system. Choose the amount of ice you need, when you want to make it.

An advanced network control system provides information about the machine's performance history to maximize operational uptime. If an issue does occur, Prodigy Advanced Sustainability can self-diagnose the issue and benchmark it. Maintenance can be accomplished faster and more effectively.

Visually communicates the machine's current status through five easy-to-understand LED-lighted universal symbols. Immediately alerts staff to key operational issues to minimize performance interruptions and ensure maintaining appropriate ice production levels. Tone/buzzer feature reinforces light symbols.

Warranty start date is stored in the controls for easy access and preventative maintenance scheduling as well as asset control management.

Preventative maintenance is simpler than ever with easily-removed panels allowing clear access to internal components. Reusable air filter is easily removable from the outside.

Prodigy Nugget Ice machines are highly efficient, using up to 50% less water and 15% less energy than cube ice machines.
